## Falcon Diamond Compound

All compounds are supplied in disposable 5 gram and 18 gram plastic applicators.

Falcon Diamond Compound is the ultimate polishing medium. Diamond is the hardest material by a large margin and therefore cuts all other materials with ease. Falcon Diamond Compound consists of extremely sharp, blocky diamond particles of uniform size suspended in a specially designed carrier. All of the features of the compound are optimum for achieving excellent finishes, rapidly, with minimum effort and cost.

All grades (except 1/2) are available in heavy (100% diamond concentration), standard (75% concentration) and medium light (50% concentration) of diamond.

Falcon Diamond Compounds are precision graded premium virgin materials that conform to all requirements of the National Bureau of Standards.

## Falcon Diamond Thinner

### Thins, Cools, Lubricates

- Developed especially for Falcon Diamond Compounds
- Penetrates quickly
- Lubricates every diamond particle for maximum cutting action
- Helps flush away abraded material
- Reduces lapping time
- Also used as an excellent stoning oil

# Falcon Precision Diamond Wheels for Jig and Internal Grinding

These mandrels feature hardened steel shanks and multi-layer diamond coated surfaces. The diamond particles are bonded onto the mandrel through the "Electrogrip" process, which maximizes diamond particle exposure assuring a free cutting action which greatly reduces heat and wear.

These mandrels, when used properly, consistently outperform conventional single layer diamond mandrels!
