Code	Applications
N	Fast cutting and general polishing.
R	Extremely fast cutting action—use dry—should be used where fast rate of stock removal is desired.
SO	Regular silicon carbide for general polishing.
HA	Hard structured aluminum oxide for polishing slots, ribs, letters and hard to get at places.
SE	Semi-hard aluminum oxide for general polishing—load resistant.
EDM	Special aluminum oxide stone for polishing electrical discharge machine surfaces.
B	An extremely hard bonded aluminum oxide. Will hold shape and give a fine finish.
PO	Softer silicon carbide with porous structure for even breakdown and fine velvet finish.

Note: All Falcon Polishing Stones with the exception of the "R" series (Pink Stone) should be used with kerosene or other lubricant. The "R" series (Pink Stone) may be used dry.

Falcon Stoning Oil and Diamond Compound Thinner

A special stoning oil developed for easier die and mold finishing. Recommended for use with all Falcon polishing stones. Helps prevent loading, cuts better, more efficiently. Falcon stoning oil is economical, practically odorless, evaporates slowly and eliminates the use of volatile kerosene. This oil is also used as a thinner/lubricant for Falcon diamond polishing compound.

Degussit Abrasive Files

Degussit Abrasive & Midget Files, Whetstones

Why they're better...

Falcon supplies the following kinds of ruby stones:

- Whetstones
- Abrasive Stones
- Midget Files

These stones are made from pure, synthetic, polycrystalline ruby; no bonding agents are ever used!

Because of their highly-sintered, bond-free, aluminum oxide structure, Falcon stones are the hardest of their kind available. Result? The performance advantages of these ruby stones and files are many:

- Great wear-resistance
- Even extremely hard materials are worked economically
- Machined parts are left with an outstanding finish
- Profile and edge stability are excellent

The Whetstones, Abrasive Stones and Midget Files are offered in extensive sizes and shapes; there's just the right one for each precision need.

Some uses...

Ruby Stones are ideal hand tools for all kinds of sharpening, polishing, deburring and fine grinding. Here are some of their other uses:

- Sharpening any kind of tool
- Chamfering cutting tools
- Engraving profiles
- Working hardened steel and other hard and abrasive materials (quartz, glass, ceramics...)

Tool, die and mold makers use these Ruby Stones, Whetstones and Midget Files in the production of cutting, bending and pressing tools, as well as for sharpening and deburring.

Our Midget Files are especially designed for use in the finishing of holes, slots and formed parts.

Some tips...

Ruby Stones and Files can be used wet or dry.

When "working wet," Falcon Stoning Oil makes an excellent moistening agent.

When "working dry," a cleaning rubber will remove all traces of the last job.

These tools are easily kept sharp by rubbing them with another Ruby Stone or file of the same or coarser type. A handlapper can be used to keep them sharp.

These Stones and Files are useful in many ways:

- Deburring
- Chamfering
- Sharpening
- Grinding
- Touching-up
- Scaling
